State and National Alcohol Trends Youth Risk Behavior Survey Data

Percentage of High School Students Who Currently Drank Alcohol,* 1991-2019†

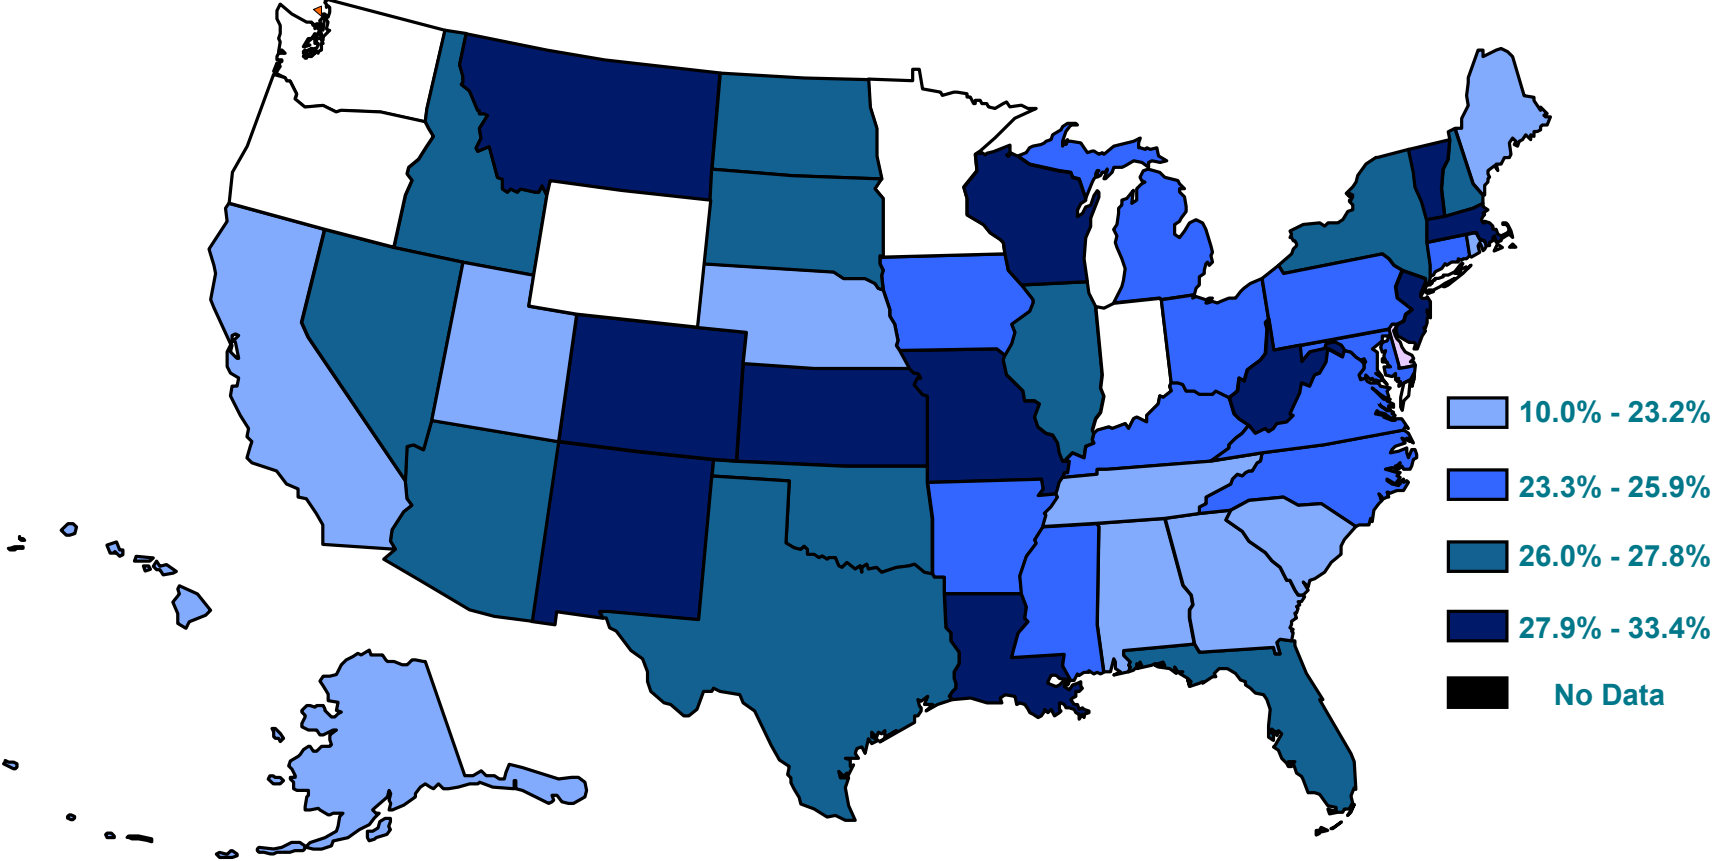

*At least one drink of alcohol, on at least 1 day during the 30 days before the survey

†Decreased 1991-2019, decreased 1991-2007, decreased 2007-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.

Percentage of High School Students Who Currently Drank Alcohol*

At least one drink of alcohol, on at least 1 day during the 30 days before the survey

Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them,* 2007-2019†

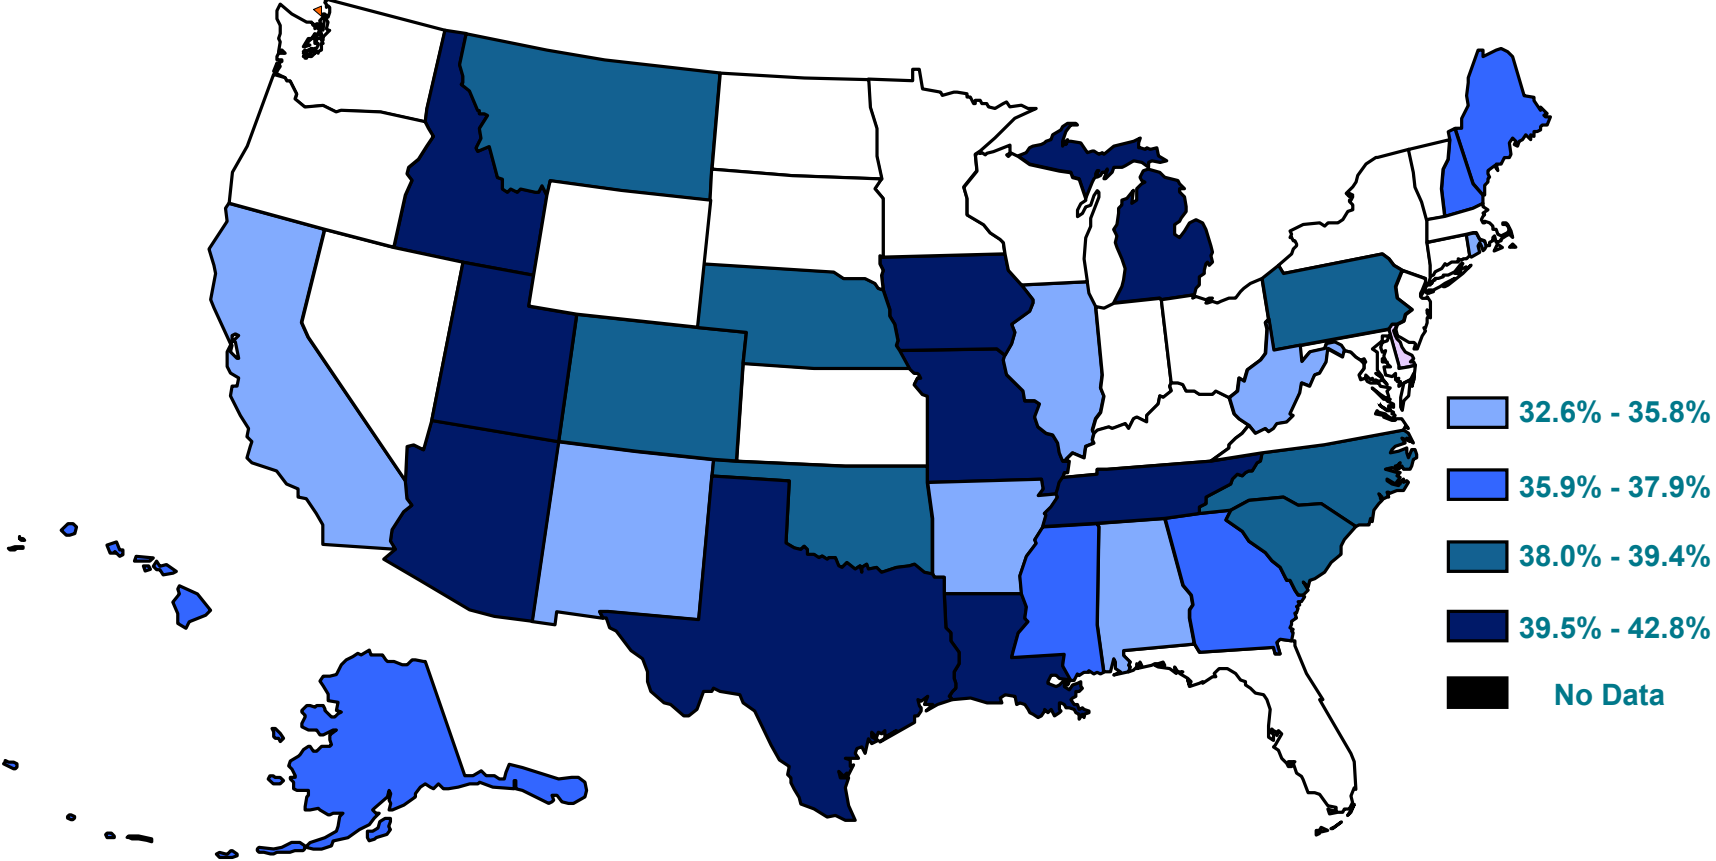

*During the 30 days before the survey, among students who currently drank alcohol

†No change 2007-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.

Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them*

During the 30 days before the survey, among students who currently drank alcohol
