* San Diego County Medical Examiner, 2021
State and National Alcohol Trends
Youth Risk Behavior Survey Data
Percentage of High School Students Who Currently Drank Alcohol,* 1991-2019†

*At least one drink of alcohol, on at least 1 day during the 30 days before the survey

†Decreased 1991-2019, decreased 1991-2007, decreased 2007-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).] This graph contains weighted results.
Percentage of High School Students Who Currently Drank Alcohol*

At least one drink of alcohol, on at least 1 day during the 30 days before the survey

State Youth Risk Behavior Surveys, 2019
Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them, * 2007-2019†
